

CLIMATE ACTION

Over the course of several years, the U.S. as well as Poland have been taking steps to improve the global, national and local environmental climate situation.

U.S. Climate Action Plan	National Energy and Climate Plan
Inflation Reduction Act	Partnership: Environment for Development
Clean Power Plan (CPP)	Strategy for Responsible Development
Paris Agreement*	Energy Policy of Poland (EPP2040)
*The United States withdrew from the Paris Agreement, but rejoined a few years later	Many EU climate goals

Interactive Climate Action Map

Visualizes key climate policies and actions in the country showing which cities are taking the most aggressive steps toward climate solutions.

Climate News and Updates

Real-time updates on climate-related news, including policy changes, scientific breakthroughs, and grassroots movements

Carbon Footprint Tracker

Users can input their daily activities (e.g., transportation, energy use, food consumption) to calculate their carbon footprint.

Climate Action Challenges

Daily or weekly challenges (e.g., reduce water usage, use public transit, plant a tree) to help users lower their personal environmental impact.

Donation & Support Options

Information about nonprofit organizations, climate action campaigns, and opportunities to donate or volunteer.

This app could create a sense of individual empowerment, educating users about the tangible steps they can take while also providing broader context on how local and national policies affect the climate crisis.

Despite significant efforts, there are many substantial challenges. That's why we propose an app that can help climate and each of us!
